

Welcome to The Nest: your sanctuary for nonprofit empowerment in San Joaquin County!

NEST stands for Nonprofit Enterprise Support Team, and is a vehicle to support our nonprofits to enhance the capacity necessary to affect change in San Joaquin County. The NEST model is a “one-stop-shopping” approach to providing education and training programs that help nonprofits build common approaches to capacity escalation. It offers dedicated workspaces for one-on-one educational guidance, group education, retreats and flex space for the purposes of providing an academic setting for nonprofit employees, leaders, and their Boards.

“I like that the space is inviting and it gives small nonprofits a professional environment to host meetings with access to audio visual equipment and other needed resources.”
